Norwegian Hull Club is a mutual marine insurance company serving members and clients worldwide and has a history dating back to 1837. The Club ranks among the largest pure marine insurers in the world and has offices in Bergen, Oslo and Kristiansand. The Club's vision is to be the leading marine insurer in assessing and managing risk. This includes developing the market's best risk assessment and pricing tools - based on data from more than 10 000 vessels/units.

The position is based in the Business Intelligence Department in Bergen. The department currently consist of three employees including a university professor.

Job description

Your main activity will be to develop methodology and tools for client risk assessment, pricing and portfolio monitoring. This involves using existing R and Excel-based tools, improving/automating these tools and develop new methodology and tools. In addition, you will be involved in the other activities of the Business Intelligence Department and Actuarial Function of the Club including management reporting, reserving, risk management and Solvency II reporting.

Your background

You have strong numeric experience in traditional statistics, actuarial science and/or datamining. Experience in R and advanced Excel/SQL is beneficial. Insurance experience is not required. You should be enduring, efficient, autonomous, creative and systematic.

Education

Master of Science or higher with top grades.

Why Norwegian Hull Club?

You will be working in a small, but competent team. The work involves research in methodology and applications in areas that were historically considered outside the scope of actuarial mathematics. Larger portfolios, more homogeneous risk, access to new data and advances in computational analysis is likely to increase the importance of analysis even more in the future.

This is a position with challenging tasks in a result orientated and international environment. It will provide you with great opportunities for personal and professional development. We offer competitive salary, insurance, pension and other employee benefits.

Interested candidates should contact our Business Intelligence Director at: christian.irens@norclub.no for more information about the position or apply on our website: <http://www.norclub.no/about/career/>.

Deadline: 23th May 2016
